DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

This application is in condition for allowance except for the presence of claim 18-21 directed to an invention non-elected without traverse. Accordingly, claims 18-21 have been cancelled.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

In view of Applicant's arguments, the drawing objection is withdrawn.

Applicant has amended the independent claim to overcome the prior art of record. Specifically, the prior art does not teach or suggest a sheet transport drum with a first comb segment with segment prongs and a second comb segment with segment prongs wherein the first comb segment and the second comb segment intermesh and further wherein pneumatic grooves are positioned into the segment prongs of at least one of the first and second comb segments.

Canadian Patent No. 1076620 to Becker discloses a transfer drum which includes intermeshing comb shaped segments (see Fig. 1). However, Becker does not disclose pneumatic

grooves in the segment prong of at least one of the first and second comb segments (see also US Patent Nos. 6,659,456 to Hieb; 4,204,471 to Becker; 4,334,473 to Becker et al., etc. which also discloses the intermeshed comb shape, but lack the pneumatic grooves in the segment prongs).

US Patent 6,450,496 to Hebert et al. is an example of pneumatic grooves in the face of the drum, however, Hebert does not disclose the comb shape. US Patents 6,561,510 to Ozaki, 5,484,001 to Bosy and 5,291,260 to Johnson are other examples of the pneumatic grooves in the face of the drum, but again lack the comb shape.

Further, there is no motivation to modify Becker, Hieb, etc. to include the pneumatic grooves in the segment prongs of the comb shaped segment since Becker, Hieb, etc. already include pneumatic means at other places in the drum.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Allowable Subject Matter

Claims 1-17 are allowed.
